Escalator Testing Equipment

Singapore Lift Inspection & Testing Pte Ltd provides precision testing equipment for escalator safety inspections. Comprehensive range of testing instruments for escalator maintenance, building owners, and safety inspectors across Singapore.

> **All equipment comes with calibration certificates. Contact:**

Product Overview

Product Name	Application
Escalator Synchronization Rate Tester	Speed & synchronization testing
Escalator Speed Displacement Tester	Speed & displacement measurement
Escalator Multifunctional Measuring Ruler	Clearance & engagement measurement
Dynamic Engagement Depth Measuring	Comb plate engagement testing
Dynamic Apron Clearance Measuring	Step clearance testing
Comprehensive Performance Tester	Full safety evaluation
Overspeed Protection Device Tester	Safety protection testing

Escalator Synchronization Rate Tester

Description

Measures running speed, acceleration, braking distance, speed deviation and synchronization rate of escalators and sidewalks.

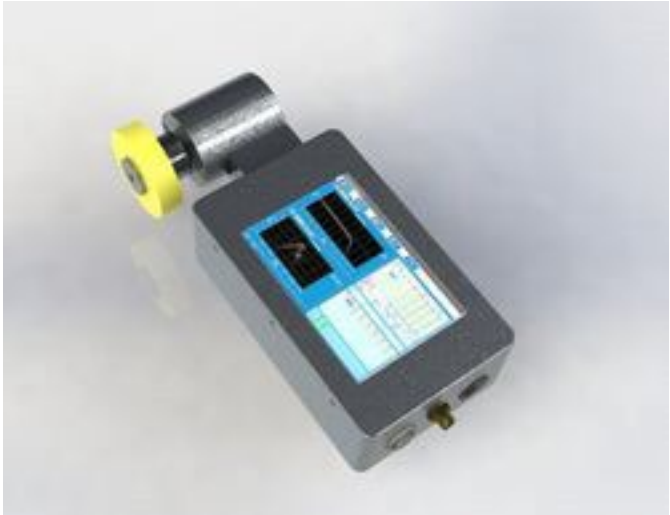
Key Features

- High-precision speed and displacement sensor
- Real-time data curve and speed display
- 64GB large capacity data storage
- Wireless communication between units
- Bluetooth thermal printing

Technical Specifications

Parameter	Specification
Speed Range	0~5m/s
Speed Precision	±1mm/s
Displacement Range	0~9999.9999m
Displacement Precision	±0.5mm
Battery	12V Lithium

Escalator Speed Displacement Tester



Description

Measures running speed, acceleration, braking distance, speed deviation and synchronization rate with enhanced measurement range.

Key Features

- High-precision speed and displacement sensor
- Touch screen with Chinese character support
- Real-time data curve display
- Large capacity data storage
- Wireless handheld control terminal

Technical Specifications

Parameter	Specification
Speed Range	0~10m/s
Speed Precision	±1mm/s
Displacement Range	0~9999.9999m
Resolution	0.1mm
Wireless Distance	10m

Escalator Multifunctional Measuring Ruler

Description

Fourth generation measuring tool for elevators and escalators. Measures clearance, engagement distance, hand strap gaps, and wire rope diameter.

Key Features

- Zero setting at any position
- Two-segment mechanical clamping design
- Direct detection without calibration
- Supports computer/printer connection
- One ruler completes multiple measurements

Technical Specifications

Parameter	Specification
Measuring Range	0~32mm
Resolution	0.01mm
Datum Thickness	1mm
Wire Rope Diameter	0~20mm
Mobile Claw	10mm

Dynamic Engagement Depth Measuring

Description

Dynamically measures engagement depth of escalator comb plate with real-time display of measured values and curves.

Key Features

- Real-time engagement depth values and curves
- Standard engagement depth line display
- Intelligent analysis and report generation
- Wireless printer for on-site reports
- Professional data analysis software

Technical Specifications

Parameter	Specification
Engagement Depth Range	0~30mm
Measuring Precision	≤0.1mm
Measuring Area	100mm
Installation Time	≤5s
Battery Capacity	1000MHA

Dynamic Apron Clearance Measuring

Description

Dynamic measurement of apron board clearance with high-precision laser displacement sensor for step clearance changes.

Key Features

- High-precision laser displacement sensor
- Real-time clearance change curves
- Sound alarm for out-of-limit clearance
- Multi-channel data synchronous acquisition
- On-site printing of curves

Technical Specifications

Parameter	Specification
Clearance Precision	0.07mm
Step Clearance Range	15mm
Step Width	600~1400mm
Angle Range	0°~+50°
Application	Escalators & sidewalks

Comprehensive Performance Safety Tester

Description

Complete safety evaluation system for escalators and moving sidewalks with three-channel synchronous detection.

Key Features

- Three-channel synchronous detection
- Real-time speed and curve display
- Hand strap deviation protection detection
- Overspeed protection capture function
- Rotary adsorption structure design

Technical Specifications

Parameter	Specification
Speed Range	0~3m/s
Speed Error	≤1%
Speed Resolution	0.001m/s
3-Channel Deviation	≤0.5%
Displacement Error	≤1mm

Overspeed Protection Device Tester

Description

Simulates sudden failure scenarios for overspeed and reversal protection testing with qualitative and quantitative recording.

Key Features

- Overspeed and reversal protection testing
- Captures protection action details
- Three-channel speed synchronization detection
- Intelligent analysis and report generation
- Press-type adsorption structure

Technical Specifications

Parameter	Specification
Speed Range	0-3m/s
Velocity Error	≤1%
Speed Resolution	0.001m/s
Driver Voltage	380ACV
Maximum Power	18.5KW

Contact Us

For inquiries about our escalator testing equipment, calibration services, or technical support, please contact Singapore Lift Inspection & Testing Pte Ltd.

Contact Information	
Company	Singapore Lift Inspection & Testing Pte Ltd
Email	enquiry@sglifttest.com
Phone	+65 9615 1522
Address	32 Old Toh Tuck Road #02-15 I.Biz Centre, Singapore 597658
Certifications	BCA-registered, bizSAFE Level 3
